

DOLLAR SPOT CAN'T CASH IN ON THIS TOP PERFORMER!

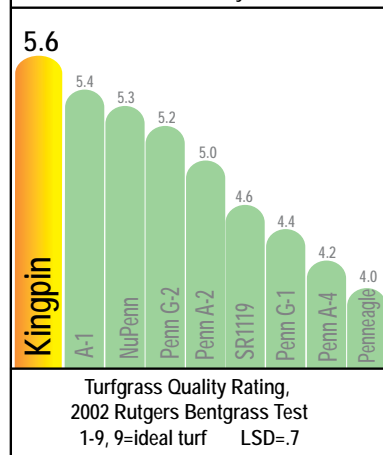

In the 2003 Rutgers Putting Green Test at North Brunswick, Kingpin out performed L-93, NuPenn, G-2, A-2, G-1, A-4 AND SR1119. Compared to other creeping bentgrasses Kingpin shows exceptional resistance to dollar spot and good resistance to many other turf diseases such as brown patch and leaf spot. Kingpin also requires less fungicide in certain conditions than most creeping bentgrasses making the environment safer. Kingpin stands up exceptionally well to spike marks, not only making it great for use on greens, tees and fairways, but making your job maintaining the turf easier and faster.

Performance Characteristics

-  **Exceptional resistance to dollar spot, good resistance to brown patch, fusarium patch and leaf spot.**
-  **High shoot density 2,200-2,600 per decimeter².**
-  **Upright vertical growth, grain free surface.**
-  **Excellent winter hardiness.**
-  **Aggressive establishment.**
-  **Strong cool weather-color retention and spring green-up.**
-  **Tolerates mowing heights from 1/8 of an inch to 3/16 of an inch. (adaptable for use on fairways)**
