

PredaSCENT™

Makes your lawn and garden “invisible”. The best protection from Deer, Rabbits, Raccoons, Opossums, Squirrels and Groundhogs

www.PredaSCENT.com

Product Information

Masking agent for your lawn or garden for deer, rabbits, squirrels, raccoons, opossums and groundhogs. Formulation for geese available.

Creates a perimeter barrier around gardens, shrubs, flower beds and new plantings.

Long lasting - lasts up to 6 weeks

Safe and easy to use - no direct contact with active ingredients.

Effective - does not wash off - Rain and/or watering actually aids the products performance.

Environmentally friendly technology – **Non-toxic & odorless**

How the PredaSCENT System Works

Each PredaSCENT capsule contains an all natural predator scent - time released over a 4 to 5 week period.

Instructions For Use

Drop PredaSCENT on the ground 3 to 4 feet apart to create a perimeter barrier around plant and garden areas. Soak each capsule with water.

PredaSCENT will absorb moisture and immediately start releasing a scent that lasts 4 to 5 weeks. Watering actually helps the product work.

Product Benefits

Reapplication is not necessary after rain or snow. Sealed, pre-measured capsules deliver maximum effectiveness without direct contact with active ingredients. Apply any time day or night in all weather conditions.

Effective Ingredients

The predator scent acts as a **natural mask** by triggering the survival instinct in deer, opossums, squirrels, rabbits, raccoons and groundhogs.
